GitHub: https://github.com/aditimaurya24 Mobile: +91 8750675447

SKILLS

Languages: C++, Python, Java, SQL
Tools/Platforms: Jupyter notebook, Power BI, VS Code, GitHub, PyCharm
Soft Skills: Time Management, Project Management, Adaptability

PROJECTS

IPL Performance Analysis Dashboard | MS Excel — Apr' 25 – May' 25

- Developed an end-to-end IPL data analytics workflow in MS Excel including data import, cleaning, preprocessing, and structured table preparation for analysis.
- Created an interactive dashboard using Pivot Tables, Pivot Charts, Slicers, KPIs, and season filters to compare team and player performance across multiple IPL seasons.
- Generated cricket insights like top performers, win-rate trends, and match patterns using calculated fields, drill-down analysis, and visual storytelling for easy understanding.

Real-Time Air Quality Index (AQI) Analysis | Python & Data Science — Mar' 25 – Apr' 25

- Analyzed 100,000+ air pollution records (2000–2024) from 500+ global cities using Python, including data processing and time-series trend analysis.
- Visualized pollution patterns using geo-scatter plots, heatmaps, and geospatial dashboards to identify hotspots and seasonal variations.
- Built an AQI alert system to detect top 5% critical pollution levels and generated insights useful for environmental policy and urban planning.

TRAINING

From Data to Decisions: A Hands-On Approach to Data Science (LPU) — Jun' 10 – Jul' 18

- Cleaned and prepared Bengaluru house price dataset (13,000+ records) and performed EDA to identify price patterns and feature correlations.
- Built and evaluated regression models (Linear Regression, Random Forest) using RMSE and R^2 to predict house prices.
- Applied feature engineering, preprocessing, and data visualization (Matplotlib, Seaborn) to improve model accuracy and highlight key price factors.

CERTIFICATES

The Bits and Bytes of Computer Networking Coursera — Sep' 24
Fundamentals of Network Communication Coursera — Sep' 24
Computational Theory: Language Principle & Finite Automata Theory Infosys — Aug' 25
Master Generative AI & Generative AI tools (ChatGPT & more) Infosys — Aug' 25

ACHIEVEMENTS

Hackathon Participation | Certificate

- Participated in a 24-hour **Code-A-Hunt Hackathon** at Lovely Professional University, demonstrating strong coding and real-time problem-solving skills.
- Collaborated in a competitive environment, applying programming knowledge, logical thinking, and teamwork to solve challenges successfully.

EDUCATION

Lovely Professional University — Phagwara , Punjab
Bachelor of Technology — Aug' 23 – Present
Computer Science and Engineering; CGPA: 6.48

GLT Saraswati Bal Mandir Sr. Sec. School — New Delhi
Intermediate — Mar' 21 – May' 22
PCM; Percentage: 66.7%

Government Girls Sr. Sec. School — New Delhi
Matriculation — Mar' 19 – May' 20
Percentage: 77%
